JOSEPH H. MURPHY
Business Manager

IN MEMORY
OF
GEORGE REINALD DEAN
Professor

We Honor

It is fitting that we pay our humble respects to this alumnus and professor of the Missouri School of Mines; to one who engendered liking and respect from his many students, and one who was a very vital part of our school.

His ability as a mathematician was known throughout the engineering world. His keen sense of humor and loyal spirit to the school will long be remembered by all the students who have attended his classes.

ALUMNUS • TEACHER • SCHOLAR • FRIEND

IN EXPLANATION

● In this 1938 edition of the Rollamo, the staff has attempted to portray all the varied aspects of the entire campus by means of written and pictorial material. We have gone into the classroom, the fraternity, the laboratory, the social gatherings, and every place that the student penetrates, and have tried to picture him as he really is, in quest of knowledge, but at the same time, enjoying himself. We hope that he, and you, will find this an interesting account.

THE ROLLAMO SALUTES
the new director

Professor Wm. R. Chedsey

A Message from the ... Director

TO THE STUDENT BODY:

Undoubtedly the engineer's responsibility and importance are increasing in modern society, and this is as it probably should be, for the things that engineers deal with mean increased comfort, safety, efficiency, and ultimately additional time for enjoying the pleasures of life. In addition, his training has been systematic, logical and rigorous. In making their decision to come to Rolla for engineering study students may have had this in mind, but it is to be hoped that a realization of it will early lead them to utilize to the fullest their opportunities while in school by contact with their instructors, and after graduation by contact with their fellow engineers in their professional groups. I wish for the outgoing seniors every possible success and pleasure in life, and for the students in the other classes such measure of success in their studies that as they approach the senior year I will be proud to offer that same wish to them.

Wm. R. Chedsey

“YOUR COLLEGE”

From its meager beginning on November 6, 1871 through sixty-seven years of fortune and misfortune to its present progressive status, Missouri School of Mines and Metallurgy has been a name known to the Technologist everywhere. While it had only three graduates in 1874 with a total enrollment of about 30, it has steadily increased to a graduating class of 93 and total enrollment of 707. The school is not known for any one department but is given its prestige by graduates in all seven major curricula.

Conceded to be the most general in its scope is the mining curriculum, which is supervised by Professor C. R. Forbes. The field of mining is readily divided into three divisions; viz, Metal Mining, Petroleum, and Geology. We find the metal mining option to include work in all departments of the school. One afternoon may be spent in Quantitative Analysis and the next one will find the student running a traverse in the school mine. The Petroleum and Geology options are more centralized. The Petroleum course takes, as special work, classes in Natural Gas Production and Oil Field Development which pertains to the drilling operations and handling of the crude oil. The Geology curriculum affords a complete outline of the formation and identification of various natural rock structures. A graduate of the Mining Department might be found along a jungle river of the Torrid Zone searching for platinum deposits or in the Arctic regions mining gold, but in any case probably in the open air.

Metallurgy is a very specialized field of chemistry. This curriculum is headed by Prof. C. Y. Clayton. The content of this course is very largely related to the smelting and dressing the ores received from the mining engineer. Processes of flotation, smelting and electro-metallurgy are studied as the means of concentrating and

refining the metal-bearing ores. The study of metallurgy is separated into the two branches of ferrous and non-ferrous metals, which merge again to constitute the now all-important division of alloys. Laboratory listing and proving of these alloys forms the essentials of the course in physical metallurgy. The metallurgical engineer will be found almost any place where there are well developed mining operations. However, the bulk of his work is done under the influence of an indoor atmosphere and the comforts of a relatively high civilization.

Civil Engineering, with Prof. J. B. Butler in charge of the department, is one of the oldest departments of the school. It is probably among

Prof. Zeuch teaches some "descrip."

the first known branches of engineering. The student of civil engineering does not do all of his work with the transit, level, chaining tape, stadia rod but receives training in the requirements of frame, masonry, and concrete structures. A large portion of his work is done with a pencil in the classroom. He must calculate the stresses and strains on each member of a structure. He must measure stream velocities and compute possible cost and power output of dams. The study of some geology fits in very nicely to the curriculum. Civil Engineers work under a universality of climates and conditions.

As a curriculum, Mechanical Engineering may be classed as specialized. Headed by

Prof. R. O. Jackson, the department gives basic instruction in many sub-fields and more advanced work in the principal one. Some of the specialties taken by the student are: Air-conditioning (also refrigeration, heating and ventilating), Internal Combustion Engines, and Welding. The course is characterized by the large quantity of instruction and practice given in Drawing and Design of machines and machine parts. Mechanical engineering is a very materialistic subject as compared with chemistry. Materials to be dealt with are tangible and take form right before "your" eyes, while the chemist visualizes atoms fitting together in an imperceptible pattern. The Mechanical Engineer must be in proximity to

Cecil Robertson takes a squint through the transit

civilization for the proper dispatch of his job.

Prof. F. W. Frame serves as departmental head for that of Electrical Engineering. This field logically divides itself into two principal fields; viz, (1) Communication engineering and (2) Electrical power production and utilization. The electrical engineering student has need for higher mathematics in great quantity and detail. For this reason, many students are known to pursue the courses in Advanced Calculus and Differential Equations. The electrical engineer may be considered a half-brother to the mechanical engineer because of the close relation between mechanical and electrical energy. In this curriculum is included the various phases of electricity such as

The curriculum of Chemical Engineering, headed by Dr. W. T. Schrenk, deals primarily with the imperceptible, minute atom and molecule. This department, as taught, is divided into two categories, one is pure chemical engineering and the second is that of Petroleum Refining. The Petroleum option carries with it the two special courses consisting of the theory and laboratory of the refining of crude oil into its many derivatives. Analysis of water, fuel and ores most properly fall under the chemical engineering classification.

Ceramic Engineering is probably the most newly developed branch of engineering represented on our campus. Prof. C. M. Dodd is in charge of this curriculum. While the art of pottery making is an old one, it is just recently that ceramics has been put on an engineering basis. The typical ceramics course would include a study of mineralogy, clay formation and purification, physical properties of ceramic ware, enamels, and bodies, glazes and colors. Study of creation of glass, fire-brick and furnace lining and their care and treatment is an integral part of present day ceramic engineering.

Freshman surveying class. Just a case of putting two heads together.

Prof. Cullison's 'Map Interp' class made many students sweat.

The Engineer Unit of the R. O. T. C. was established at the Missouri School of Mines in March 1919 and was made permanent by the National Defense Act of 1920. The end of the first school year found 104 students in the basic military courses, and 3 in the advanced course. At present there are about 400 in the basic courses and 35 in the advanced course. Fifteen of the advanced corp will receive their commissions this year.

All officers above that of Corporal are from the advanced corp. The highest office is that of the Cadet Major who is exempt from all fees and tuition for his Senior year. This year the Cadet Major is Eugene B. Lanier.

SENIOR INSPECTION TRIPS

In the spring of each year, the Seniors of the different engineering departments of the Missouri School of Mines take an inspection trip during which they visit plants engaged in the type of work for which they have studied.

The trip is looked upon as one of the high spots of a Senior's year, both from an educational standpoint and from the standpoint of entertainment. The educational purpose of the trip is to give the Senior an understanding of the breadth and variety of types of work which can be found in his chosen field. While on the trip, he is visiting new cities, meeting new people, seeing different parts of the country, all of which is not only educational but also entertaining.

Each of the Departments makes its own trip. This year, the Metallurgists went east to attend the annual meeting of the American Institute of Mining and Metallurgical Engineers, which was held in New York City. They spent five days there and in addition visited the following plants: National Malleable Co., Cleveland Wire Works, Case School of Applied Science, all of which are in Cleveland, Ohio; Simonds Saw and Steel Co. and the Research Laboratory of the United Carbide Co. in Buffalo; Niagara Power and Light Co.; the General Electric Plant and Laboratories in Schenectady; and the Aluminum Company of America plant at New Kensington, Penna.

The Mechanical Department went down to Tulsa, Okla. for one week where they attended the Oil Show. In addition, they visited the Barnsdall Refinery and the Municipal Light plant at Bartlesville.

The Mining and Geology students took a trip of two weeks duration, during which time they visited the Tri-State mining district, the Bauxite Mines of Arkansas, the Birmingham steel mills and iron mines, the zinc mine at Mascot, Tenn. and the sulphur and copper mine at Ducktown, in the same state, the Norris Dam of the Tennessee Valley Authority, and the fluorspar and coal mines of southern Illinois.

The Seniors in the Chemical Department spent a week in St. Louis where they visited many of the large manufacturing plants operating in their respective fields.

The Senior Electricals traveled to Chicago and Milwaukee for one week where they inspected many of the large manufacturing concerns. Both the Civil and Electrical groups were in Chicago at one time so that by the end of the week the town was well aware of the existence of a Missouri School of Mines.

The Senior petroleum students took a trip in their Junior year to the oil fields in and around Rodessa, La. As a consequence, no regular trip was scheduled for this year.

The Senior Civil Engineering students took an extensive trip, which carried them through Jefferson City, Keokuk, Iowa, and into Chicago, where they spent several days, visiting the large industrial and civic projects located there. They later visited several plants in the Milwaukee area, and on the return trip, stopped off at Joliet, Ill., where they visited the Hydraulic Power Dam of the Chicago Sanitary District.

This report has not attempted to go into the detail of the many inspections which these trips required, but has only tried to acquaint the reader with the general activities of such a trip. Nothing, however, has been said about the activities of the evenings. Much could be written about the fun that was had, but that, we are sorry to relate, is not part of the scheduled routine trip. The fellows do say, though, that, after four years of Rolla, the bright lights are most interesting.

MISSISSIPPI VALLEY EXPERIMENT STATION

To date few Government establishments are authorized as explicitly as the Bureau of Mines to undertake conservational activities, so in order to give the reader a better idea of the purposes of the Bureau a paragraph is quoted from the organic act of 1910 establishing the Bureau of Mines as a bureau in the Department of the Interior. The purposes in part are as follows:

"That it shall be the province and duty of the Bureau of Mines, subject to the approval of the Secretary of the Interior, to conduct inquiries and scientific and technologic investigations concerning mining, and the preparation, treatment, and utilization of mineral substances with a view to improving health conditions and increasing safety, efficiency, and economic development and conserving resources through the prevention of waste in the mining, quarrying, metallurgical, and other mineral industries."

The Mississippi Valley Experiment Station, one of 14 similar stations located in important mineral-producing areas in the United States was established on July 1, 1920 as one of the ten Foster Act experiment stations of the Bureau of Mines. Most of these stations are located on the campuses of State universities or in places where state-endowed bureaus of mines, geological surveys, etc., are maintained, and where facilities for cooperative work on local and general problems falling within the scope of the Bureau are available.

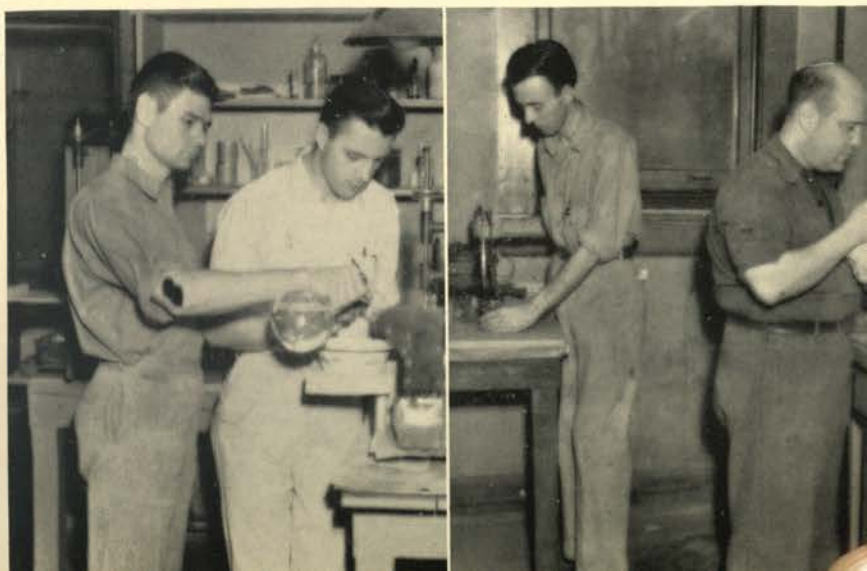

In accepting the invitation of the Missouri School of Mines to locate its experiment station on the campus at Rolla it was the desire of the Bureau to establish a station in a territory that would serve the industry in the treatment of the non-argentiferous simple ores of lead and zinc, of which Missouri and the adjacent territory in the Mississippi Valley is one of the leading producers.

Beginning with the fiscal year 1921-22 the school allotted funds for the appointment of graduate research fellows to work under the direction of the superintendent of the station. The requirements for these fellowships were that the appointees have a B. S. in mining or metallurgy, that they devote about half of their time to class work leading to a master's degree, and the other half to research that would form the basis of an acceptable thesis. The fellows were appointed for one year, July to June, inclusive, with one month's vacation. The stipend was, and still is, \$800 per year.

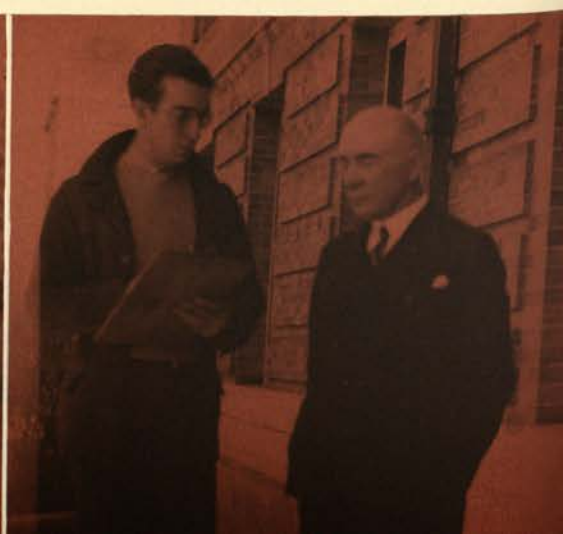

Beginning with the fiscal year 1932-33 the applicants for fellowships were required to have their masters' degree and become candidates for a Ph. D. The stipend remained the same but the residence time was reduced to ten months with the fellow being granted the regular school holidays and vacation.

EXTRA- CURRICULAR ACTIVITY

Phi Kappa Phi

MURPHY LANIER THOMPSON
STOKES SEIBEL
CORNETT ALGER

The honor society Phi Kappa Phi is composed of professors and students of all departments of the institutions at which its chapters are located. The motto of the society, "The love of learning rules the world" exemplifies the society in all its phases.

Scholarship and character in the thoughts of college students are emphasized by the society. It holds fast to the original purposes of educational institutions and stimulates mental achievement in all branches of learning by recognition through election to membership.

Student members are elected by the chapter from the upper ten percent of the graduating class. Graduate members are elected from those whose scholarship merits award. In addition, the chapter awards the upper ten percent of each class a bookplate bearing the society's seal.

Tau Beta Pi

Considered the highest honor engineering fraternity on the M. S. M. campus, Tau Beta Pi selects its men from the top of the Junior and Senior Classes. While distinguished scholarship is the primary requisite for admission into Tau Beta Pi, it is not the sole criterion. Character, capacity for leadership, social qualities, and personal appearance are other factors considered in selecting men.

Theta Tau

Theta Tau is a professional engineering fraternity whose first chapter was founded at the University of Minnesota, October 15, 1904. The eighth chapter, the Iota Chapter of the Missouri School of Mines, was established here on February 5, 1916. Membership in Theta Tau is not based altogether on high scholastic standing; its members are selected from those students which have the most promising engineering ability in general. The purpose of the organization is to stimulate a high standard of professional interest and ethics among its members. The ritual and ceremonies of the meetings are in themselves symbolic of this purpose.

The following men were elected to office for the school year 1937-38: Regent, E. B. Lanier; Vice Regent, H. L. Prange; Scribe, W. P. Ruemmler; Treasurer, W. D. Waters; Inner Guard, C. L. Clayton; Marshal, Cecil Robertson; Corresponding Secretary, A. E. Rhodes; Outer Guard, W. F. Oberbeck; Faculty Adviser, Dr. Clair V. Mann.

Alpha Chi Sigma

The Alpha Chi Sigma has as its chief aim the promotion of an interest in chemistry as well as creating a better understanding between Chemistry students and professional men.

Membership is by election and is open to any man who is now following the profession of Chemistry or is in preparation for his life's work in Chemistry. No person is eligible who is conditioned in any subject.

The officers of Alpha Chi Sigma are: Master Alchemist, C. R. Maise; Vice-master Alchemist, E. A. Ballman; Master of Ceremonies, W. B. Dunlap; Treasurer, W. T. Pearl; Reporter, R. L. Yungbluth; Recorder, H. F. Crecelius.

The Beta Delta Chapter of Alpha Chi Sigma was installed at the Missouri School of Mines on May 2, 1936. During the two years the fraternity has been on this campus, it has shown marked gain in popularity and now has a membership of fourteen collegiate and eight professional members and a pledge roll of six.

Blue Key

In 1924 Major B. C. Riley of the University of Florida organized the Blue Key National Honor Service Fraternity. It was composed of the outstanding student leaders of the student body, who worked to improve and help their school.

The purpose of the Blue Key is to serve its institution. Our local chapter has shown its service to the school by adopting and fulfilling the following program for 1937-38:

1. To publish the school directory for 1937-38.
2. To arrange a Homecoming program.
3. To award a shingle to 10% of the freshmen class for outstanding qualities in leadership, scholarship, and willingness to serve his school.
4. To promote a "Keep Off The Grass" program.
5. To decorate the Gym for the Commencement Ball, and to provide ushers for the graduation exercises.

The officers elected for 1937-38 were: J. C. Ellis, President; W. L. Goelkel, Vice-President; J. H. Murphy, Treasurer; M. E. Nickel, Corresponding Secretary; J. C. Radcliffe, Alumni-Secretary.

Alpha Psi Omega is a national honor dramatic fraternity. The Alpha chapter was founded at Fairmont State College, Fairmont, West Virginia.

The Missouri School of Mines cast, Delta Pi, was granted a chapter in May, 1934 and replaced the organization known as the M. S. M. players.

The membership in the local chapter is limited to students and faculty of the School of Mines who have taken part in at least two plays, and to persons, who, because of extraordinary interest in dramatics, have been granted honorary membership.

The officers of the Missouri School of Mines Cast for the school year 1937-38 are: Director, J. R. Long; Vice-Director, C. R. Maise; Secretary-Treasurer, E. F. Hill; Faculty Advisor, Professor G. O. Ranes.

The Society of American Military Engineers had its inception in the World War, and was incorporated in 1920 in the District of Columbia. It was established for the purpose of furthering national defense, of linking more closely civilian and military engineers, and of procuring, preserving, perpetuating, and disseminating knowledge and information relating to engineering operations.

The Post at the Missouri School of Mines was established this year and replaces the Officers' Club of previous years. It is the purpose of this post to further the interests of the Society and to sponsor the annual military ball.

AMERICAN SOCIETY OF CERAMIC ENGINEERS

The M. S. M. Student Branch of The American Ceramic Society was founded on this campus in 1937. It was formerly known as the Orten Society and is comprised of students of Ceramic Engineering. Its purpose is to create a closer bond of fellowship among members of the ceramics department and others interested in the industry. The organization sponsors meetings at which motion pictures descriptive of the field are shown and talks are given by prominent members of the ceramic industry.

IRA REMSSEN SOCIETY

Ira Remsen Chemical Society was founded on the campus of Missouri School of Mines and Metallurgy on October 11, 1923.

The object of the society is to stimulate an interest in chemical engineering, and to extend the practical knowledge of chemistry to the students of the school. This purpose is fulfilled by having men of prominence in science and industry address the society at the meetings which are held twice a month.

The membership is not limited to students of chemical engineering, but is open to all who may have an interest in current chemical problems and progress in chemistry.

The officers of the Ira Remsen Society are: President, E. F. Hill; Vice-President, E. A. Ballman; Secretary Treasurer, R. M. Stewart.

MISSOURI MINING AND METALLURGICAL ASSOCIATION

The Missouri Mining and Metallurgical Association is an affiliate of the American Institute of Mining and Metallurgical Engineers. It was established at the Missouri School of Mines for the benefit of the students who are studying mining and metallurgy.

Men prominent in these fields are obtained as speakers for the meetings and in this way the future miners and metallurgists learn of the present conditions in the field in which they are studying to enter.

Because the Association is an affiliate of the American Institute of Mining and Metallurgical Engineers the students receive their publication, Mining and Metallurgy, which is an up-to-date monthly magazine covering current practice in their field.

The officers of the organization are: President, M. E. Nickel; Vice-President, J. F. Carroll; Secretary, R. G. Prough; Treasurer, W. D. Waters.

The AMERICAN SOCIETY OF CIVIL ENGINEERS

The American Society of Civil Engineers first appeared on the Missouri School of Mines campus in November, 1923. The purpose of the student chapter is to further the study of civil engineering.

The Society was organized by the Junior and Senior Civil Engineering students, assisted by Professor Butler. For a number of years, the Society was limited to only Juniors and Seniors, but in more recent years, membership has been extended to Sophomore and Freshmen Civils.

One of the interesting and beneficial phases of the society is the lectures and reports on engineering conditions and problems given by prominent engineers.

The officers of the local chapter of A.S.C.E. are: President, E. B. Lanier; Vice-President, R. G. Livingston; Secretary-Treasurer, Cecil Robertson.

The AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS

The American Institute of Electrical Engineers is a society which was founded by Mr. R. S. Keith, in New York City in April, 1884. This society was organized for "the advancement of the theory and practice of electrical engineering, and the allied sciences." Every student taking Electrical Engineering is eligible for the A.I.E.E.

The branch at Missouri School of Mines was approved by the Institute in March, 1925.

The officers of the Missouri School of Mines branch are: Chairman, R. C. Seibel; Vice-Chairman, R. W. Matthews; Secretary, L. E. Smith; Treasurer, P. J. Moore. The executive committee is composed of one senior, one junior, and one sophomore. These men are Fred Mueller, Robert Haviland, and William Alexander.

AMERICAN SOCIETY OF MECHANICAL ENGINEERS

The student branch of the American Society of Mechanical Engineers was organized on this campus in the spring of 1930 by Dr. Aaron J. Miles.

The principal purpose of the society is to advance the art and science of engineering among those students who are interested in mechanical engineering as a profession. Membership in the society makes the students eligible for the many privileges of the parent society and a subscriber to the technical journal of the society.

Activities of this branch of the A.S.M.E. have included talks by prominent men engaged in the industry, thereby enabling the student to couple the theoretical with the practical side of engineering. Students are offered the opportunity for self-expression on technical topics by the presentation of technical papers.

The officers of the society for the school year 1937-38 are: Honorary Chairman and Faculty Advisor, Dr. Aaron J. Miles; Chairman, D. R. Jaenecke; Vice-Chairman, J. C. Ellis; Secretary, H. L. Gerwin; Treasurer, J. C. Moore.

The Student Council of the Missouri School of Mines is a new organization on the campus this year; it was formed late in May, 1937, and its primary objects are: to form a mutual relationship between the students and the faculty, to maintain a just form of student government, and to promote student welfare.

The Council consists of eighteen representatives, one from each of the social fraternities on the campus and nine from the independent group.

Meetings are held each month. The Council recommends to the faculty, with the interest of the student body as its guiding light, procedures which it believes will foster and promote school spirit and bring honor to the institution.

The Rollamo Board

The primary function of the Rollamo Board is to compile and edit a lasting record of the activities of the students of the Missouri School of Mines. Toward this end, a board is chosen in the spring, which, with the aid of tryouts, works throughout the succeeding year, gathering pictures, compiling data, and assimilating the humorous and serious asides which make the life of a student something to be remembered. It is the magnitude with which the book is planned that determines the book's success, for unless the plan is to include as many of the student interests as possible, the book fails to be a record that each student feels he had a hand in making. If emphasis is given to any particular group, it is to the Seniors, for the 1938 Rollamo should be to them a lasting remembrance of what they have accomplished during their stay on this campus. It is our hope that you will enjoy this, the 1938 Rollamo, as much today as in the years to come.

Reception Given Prof. Chedsey By Townspeople

Banquet Held at Sinclair Pinnat Tavern by Ralls Chamber of Commerce

JOHN R. McCLOSKEY
Editor-in-Chief

EDWARD W. SIMPSON
Business Manager

Prof. William R. Chedsey, new Director of the School of Mines and Metallurgy, was given a warm reception at a dinner reception given at the Sinclair Pinnat Tavern, Wednesday night. About 125 persons attended the affair. E. D. Scherer, president of the Chamber of Commerce, acted as hostmaster.

W. B. Ogilby, speaking as representative of the Ralls Club, extended a welcome to the Chedsey. V. M. Smith, president of the Ralls Lanes Club, welcomed the guest of honor on behalf of the lanes.

H. H. Astor, Registrar and Student Advisor of the School of Mines and Metallurgy, gave a brief talk on the subject "Town and Mines." He stressed the point that there should not be any great distinction between "town" and "mine." He pointed out the great value of the school to Ralls in a number of ways.

Charles L. Woods, editor of the Ralls Herald, speaking on behalf of the Ralls Herald, who could not be present, made an address of welcome to Prof. Chedsey and Mrs. Chedsey. He pointed out that the school had always stood behind the school in everything that it attempted, and that it was through the efforts of Ralls citizens that the school was established here. Woods then presented a bouquet of fall flowers to Mrs. Chedsey.

President Scherer introduced Professor Chedsey, who expressed appreciation for the welcome extended to him and Mrs. Chedsey. He said he would exert every effort possible for the betterment of the school and of Ralls.

Bollman and Gill Start Season With 27-0 Victory Over

Rousing Pep Rally Held Friday

Scout Independent Trophy

The game against Carbondale, which the Miner football team turned in last Saturday night, was a real test for the team. The team was led by Bollman and Gill, who started the season with a 27-0 victory over Carbondale. The game was a real test for the team, and they showed a lot of improvement.

PHI KAPPA PHI ELECTIONS
The Missouri School of Mines Chapter of Phi Kappa Phi elected officers for the coming year at a meeting held last Wednesday night. Prof. C. M. Todd, the retiring president, presided.

The chapter of Phi Kappa Phi is a National Scholastic Honor Society to which only students who have outstanding

Plan New Chapter of A. I. E. E.

New Officers Elected at Wednesday's Meeting

About forty students met in the Physics Lecture Room of Newman Hall last Wednesday night for the purpose of organizing a new chapter of the American Institute of Electrical Engineers. Professor Lovett explained that to be a member of the local organization, one does not necessarily have to be a member of the national organization. The fee for the local organization is \$10.00 per semester, for a total of \$20.00 per year.

The officers elected were: Chairman, Robert Baker (senior); Vice-President, Roy Matthews (senior); Secretary, Leroy Smith (junior); Treasurer, Paul H. Moore (senior). The members of the program committee selected were: Fred Muller, assistant; Don Harland, Junior; and William Alexander, sophomore.

Following the election three sessions gave talks on the work they had been doing in the field of electrical engineering during the summer. Roy Matthews spoke on his work in a new and useful factory. Robert Baker gave an interesting description of the manufacturing of electric motors in the Wagner Electric Company plant at St. Louis. Other Valley gave a few facts concerning the municipal power plant at Hannibal, Mo., exhibiting drawings he made of the plant.

Plans were made for having a speakers bureau come next radio station talk before the group. The probability of having a General Electric Corporation engineer give a lecture and demonstration was also discussed.

The time and place of the next meeting will be announced on the bulletin board. All electrical engineering students are urged to come.

M. M. M.
The plans for increasing in visibility and some of the dock fittings had been swept overhead, when the Captain decided to send up a signal of distress. Hardly had the rocket burst over the ship when a second flare passenger stepped on to the bridge.

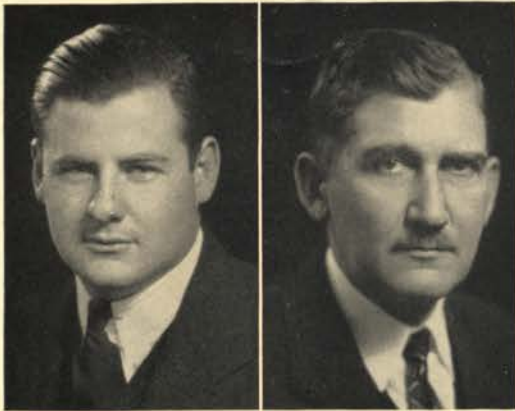

"Captain," he said, "I had gone

The MISSOURI MINER may well be called the voice of the student body. In this weekly paper are published the ideas and policies voiced as the student opinion. It has as its policy and everlasting goal, the unification of the entire student organization into a strong and active group. The creation of a feeling of closeness between faculty and student is kept foremost in its pages.

The MINER is operated by a student organization called the Miner Board. This board is made up of the business and editorial staffs. New members are elected each year to fill vacancies left by graduating members. The candidates serve as tryouts for one year and their selection is based upon a competitive score.

The MINER is twenty-three years old and its growth and strength have kept pace with the times. Able management will see it continue to grow and take its place among the college papers of Missouri.

There appeared on the campus this year, a new face in the family of M.S.M. publications. Replacing the old M.S.M. Alumnus was the sparkling new Technogram, a monthly magazine designed to interest student and alumni alike. Pictures and articles of campus happenings, as well as technical articles and news of the alumni were contained in each issue. The magazine has been a big factor in improving the alumni relations with the school and it is our sincere hope that the publication will have a long and important part in campus affairs.

JIMMY GILMORE

and his

ORCHESTRA

For several years the School of Mines has had a campus orchestra to furnish the music for dances, both in the gymnasium and in the various fraternity houses around the campus. Four years ago, a versatile young man entered school from St. Louis. Immediately he became interested in the orchestra, and was soon one of its best trumpeteers. However, when interest was ebbing and not even the members themselves took much interest in the affairs of the band, the group practically disbanded. It was at this point, then, that Jimmie Miller, more commonly known among dance lovers as Jimmie Gilmore, took over the affairs of the band and quickly the organization rose to prominence.

With the acquisition of Bobby Smith as chief saxaphonist, and Ray Stewart and Sam Kurtz as trumpeteers, the orchestra quickly improved until now it is one of the best campus bands in the state. The Miners have danced to the orchestra at the most prominent dances during the school year, and at many of the fraternity affairs.

With Smith, Stewart and Kurtz as leaders, there are now several fine musicians playing regularly. Charlie Faulkner, the youngster of the outfit, does a grand job on his trombone to round out the brass section. Gilmore occasionally changes from leading the band to a trumpet (when the boys let him).

The reed section is outstanding with Smith at the tenor sax; Jim Katz, a freshman, playing lead; Chuck Sultzman, also a first year man, "riding" the clarinet, and "Stude" Steward, pushing out those base notes from his baritone. Steward is a sophomore.

The rythm section, which is the foundation of any band, is also outstanding. Johnny Johnson is the smiling guy who plays the drums, and who obligingly laughs when someone hits his cymbals. Marvin "Doc" Niemiller plays the bass horn and doubles on the bass fiddle, while Jim Bock, a freshman from Florida, tickles the ivories.

During the past four years the orchestra has furnished the Miners many pleasurable hours, and much credit can be given to their guiding light, Jimmie Gilmore. Take a bow, Jimmie.

Jimmie Gilmore smilingly sings into the "mike" as a feature of the nights dance programs (inset); while the Brass section swings out in the upper left. From left to right they are: Ray Stewart, Sam Kurtz and Charlie Faulkner. On the upper right five of the men are getting in a little extra practice, with Niemiller thumping the bass fiddle, the brass section stepping out, and Jim Bock at the piano. Johnny Johnson the drummer is cutting up in the lower left picture, while the lower right shows the reed section hard at work. They are, from left to right, Chuck Sultzman, Jim Katz, Bobby Smith and "Stude" Steward. Bock is at the ivories.

COACHING STAFF

GALE BULLMAN
Head Coach

A new staff of coaches took over the athletic reins at M. S. M. this year and in the first nine months, proved themselves as capable men. Head Coach Gale Bullman came to Rolla from Washington University, where he had served as assistant coach for several years.

Bullman starred in all branches of athletics at Virginia Wesleyan University and completed his playing career by two years of professional football.

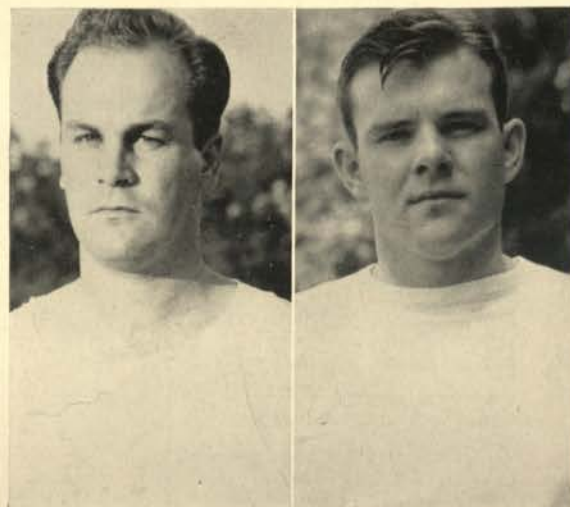

Percy Gill has been Bullman's first assistant in all branches of sports as well as head coach of the basketball team. Percy was a star player at Missouri U. and later served two years as Freshman coach at Washington U. His likeable personality has won him a warm following among the students at M. S. M.

Jim Parker, captain of the Cape Girardeau team last season, has been serving as assistant coach while pursuing his studies in the Chemistry Department. His help has been valuable to the team.

ATHLETIC ASSOCIATION

MANAGERS

HENRY W. KUHLMANN, JR.

JOHN R. LONG

The function of the Athletic Association at the Missouri School of Mines is to take care of all details necessary to carry on the program of inter-collegiate sports. The members of the association care for the equipment on the playing field, aid the visiting team with any necessary services, and make hotel arrangements and the like when the Miner teams are traveling. The policies of the association are governed by a board consisting of Prof. C. Y. Clayton, Coach Bullman, Prof. F. E. Dennie, and Mrs. Bertha Jackson.

MELVIN NICKEL Captain 1937 Football Team

Last season Nickel was injured in the St. Louis University game, and as the result spent quite a bit of the season on the sidelines. This fall he reported for practice but reinjured his knee on his first night-out.

Advised by the doctor to give up football or be permanently on the shelf, he spent the rest of the year on the sidelines. Thus he was forced to wind up three years of service watching his team in action, instead of leading them.

A likeable personality has won many friends for "Little Mel" and he will be missed next year.

QUARTERBACKS

JAMES KIESLER
WALTER KOZIATEK
R. A. WEBB

The team that lined up for the last game of the season. The line: Wilson, Klug, Curtis, Spafford, Kirwan, Prough, Murphy. The backfield: Ladd, Baumstark, O. Taylor, and Koziatek.

● RICHARD "DICK" PROUGH.....Kirkwood, Mo.

Dick wound up his college career by placing on the All-M. I. A. A. team, the only one on the team having done so. Always a steady offensive player, he shone the past season on the defense, and the three victories that came to the Miners can be partly credited to his leadership as acting captain. Dick was a leader on the field as well as on the campus.

● JOE "FIGHTIN' IRISH" MURPHY.....Rolla, Mo.

One of the best liked men on the campus is Joe Murphy, senior end, who has played in every game in four years of competition. A heady player, Joe was hard to stop at all times, and when he got his hands on a pass, he seldom let go. Quiet and determined, he was a real player and a real man.

● JOEL "CONCUSSION" LOVERIDGE.....Kirkwood, Mo.

One of the few juniors on the football team, Joel was also one of the best defensive backs in the conference. Especially did he shine on pass defense, and saved many a game for the Miners in those last wild minutes of the game, when the opponents throw passes like a basketball team.

● JOHN "TOOTHY" KIRWAN.....New York City

The toughest man on the field was John, and according to the men who played across from him, he was always able to take care of himself in the heat of the game. One of the few men who played the game for the game itself, he was one of the star guards.

● IRVAN "WHITEY" CURTIS.....Oblong, Ill.

Another guard and another junior. However Whitey was one of the best football players on Coach Gale Bullman's team. His ability at guard need not be discussed, and the fact that he led the team in several games, disposes of his popularity.

● JIM "STOOGIE" KIESLER.....Chicago, Ill.

Jim is one of the smallest men on the team, but is also one of the smartest and toughest. One of the best ball carriers on the team, he will be back next year to carry on with his shifty dodging that is hard to stop. Three years on the Miner team for Jim.

● JOE "ARKANSAS" SPAFFORD.....Fort Worth, Texas

Football is always first with Joe, who has had tough luck while trying to fill the center gap for the Miners. Early season injuries last year kept him on the sideline for most of the season. This year he came back with a bang and played steady football. An excellent offensive player.

- WALTER "AIREDALE" KOZIATEK.....St. Louis, Mo.

"Watch that little kid" was the favorite yell of the Miner opposition during the past year. Walter was always there at the right time — to prevent touchdowns — to block — to carry the ball, and to, at all times, play to the best of his ability. Was placed on the all-star second team.

- JIM WILSON.....Louisville, Ky.

Jim was the tough luck player of the team the past year and if a broken wrist hadn't stopped him, he would have probably rated all-star. Jim was one of the best defensive players on the team, and had little trouble in catching passes that were tossed to him on the offense. "Yo —" was another one of those "popular guys."

- OTIS TAYLOR.....Herrin, Ill.

This snake-hips halfback is one of those players who bust past the line of scrimmage, and then it's just too bad for the opposition. "Ot" liked to carry the pigskin, and scored quite a number of points for the Miners in his two seasons.

- HARLEY LADD.....Thayer, Mo.

Just a grand guy from the Ozarks. Harley was moved to halfback this fall from the fullback post, and had his first chance to carry the ball. His natural speed came into use, and many of the Miner gains could be traced to his running.

- PRESTON AXTHELM.....St. Louis, Mo.

Ax got his first chance at center this fall, having played fullback last season. His excellent work on the defense earned him praise and needless to say, he was one of the mainstays of the line.

- JACK "POLO" FLANARY.....Claremore, Okla.

Polo played his second year for the Miners last fall, and turned in several good performances at tackle. During the late season injuries kept him on the sidelines. Coach Gale Bullman is depending on Polo for one tackle on the 1938 eleven.

- CARL LINTNER.....Moberly, Mo.

Carl was one of the three ends who gave good accounts of themselves at all times. During several of the games Carl had to play the whole time, and it was seldom that the opposition gained around his end. A steady player, he stood up under punishment that an ordinary player couldn't take.

- WALTER BAUMSTARK Kirkwood, Mo.

Walter was a hard-hitting fullback who was hard to stop once he was started. This was the first year for Shorty at the fullback post, and he credited himself nicely.

- DICK CUNNINGHAM St. Louis, Mo.

Triple threat man who played his first season for the Miners. Dick was probably the most improved back of the season, and will be a big help to the Miners next fall.

- RALPH STALLMAN St. Louis, Mo.

Ralph was one of the freshmen guards who showed great promise. In tense moments in the most important games, Ralph would come through to help the Miner's cause. He should also be an important cog in the Miner eleven next season.

- DON HART Palestine, Ill.

Don was the second-string fullback whose inexperience held him back from the regular post. He needed another year's experience and would have been one of the regulars next season.

- ROBERT KLUG St. Louis, Mo.

From substitute to regular tackle is the story of Klug, a very determined player who was always trying hard. His best game was against Cape Girardeau.

Baumstark is stopped by Carbondale. We wonder who those feet belong to?

Cunningham across the line for six points

"Murph" has this one on his fingertips

- J. W. STEPHENS.....Sedalia, Mo.

Steve was injured in one of the first games of the season and did not hit his regular form until the schedule was almost over. Husky, speedy and with a fighting spirit, Steve should be a star next season.

- J. F. TAYLOR.....St. Louis, Mo.

Jim performed most of the extra-point booting during the year, and his excellent blocking and running helped the Miners toward victory. He should be another one of the stars on next year's eleven.

- W. H. VOLKMAR.....Jefferson City, Mo.

Rosie played his second year for the Miners and proved a good dependable guard when called on. He should do great things in the next two seasons.

- F. B. ROGERS.....Maplewood, Mo.

Another one of the freshmen who came through in the pinch for the Miners. Played guard with Stallman and was quite dependable.

- MARVIN NEVINS.....Willamette, Ill.

Was ineligible for conference competition but played good ball in the non-conference games. Should be a regular end next fall.

Ladd starting out for the goal,
90 yards distant

"That little feller" is on his way with the whole Miner team clearing the way

Capt. "Buddy" Clayton

Left to right: Coach Gill, Watts, Romine, Rieke, Nesley, Moreland, Clayton, Wampler, Kamper, Wilson, Spalding, Niemiller, Ballman, and Cunningham.

Top Row:

MORELAND, SPALDING
BALLMAN, WATTS
RIEKE, NESLEY

Bottom Row:

CLAYTON, WILSON
KAMPER, WAMPLER

CAPT. CHARLES (Buddy) CLAYTON
Rolla, Mo.

Buddy, wound up a four year career on the Miner basketball this year, by playing regular guard. Buddy was quite an important cog in the machine, and will be missed next year. He was well liked.

HERB KAMPER
St. Louis

Undoubtedly the best shot on the team, Herbie kept the Miners in the running most of the games. His next two seasons should be quite successful.

JIM WILSON
Farmington, Mo.

Jim was the sparkplug of the defense throughout the season and remained the leader of the team during trying periods. Besides playing the part of a balance wheel, he was one of the fans' idols.

FLOYD WATTS
Rolla, Mo.

One of the best shots in the business, Floyd was high point man in several of the games. Known as a "hot" and "cold" player, he was one of the regulars throughout the season.

HAROLD WAMPLER
Bonne Terre, Mo.

Red is one of the freshmen who earned himself a regular job through his steady playing at the pivot post. With three years ahead of him, he should be a bright light of future Miner teams.

VERNON RIEKE
Owensville, Mo.

A transfer student who had played two years, Vernon was a very valuable member of the Miner team. His experience helped the Silver and Gold quintet through many a tight spot. Vern should have his best year next season.

WILLIAM NESLEY
St. Louis, Mo.

Although not a letter man his first year, Bill was a steady, dependable player and will help next year's team a great deal.

GORDON MORELAND
St. James, Mo.

Chick returned to school after an absence of two years and immediately went out for the team. However a leg injury kept him from seeing much action.

MARVIN NIEMILLER
Rolla, Mo.

Doc played his first year for the Miners, and did not get much chance to shine until the last six games. Then he was inserted as one of the regular guards and came through in fine fashion. The next three years should find him a regular.

CLARK ROMINE
Casper, Wyoming

Another transfer student is Clark, and his help to the Miners came in crucial times. Coach Perry Gill depended on Romine a great deal, and his two coming years should be successful.

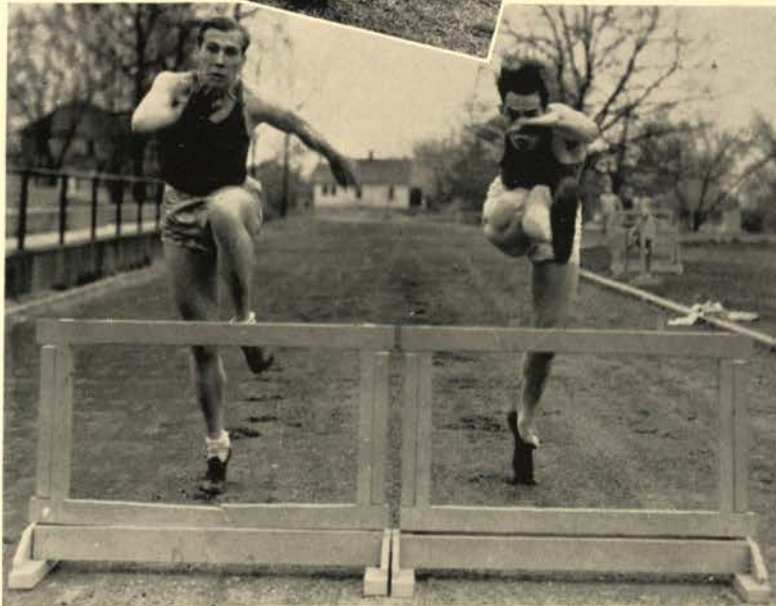

VIC SPALDING
Moberly, Mo.

Vic wound up two year's competition this season with a fine brand of basketball, and will be sorely missed next year. He will always be remembered for his excellent work in the tight spots.

EDDIE BALLMAN
University City, Mo.

Eddie wound up his collegiate career by retaining his title of the "scrappiest" player on the Miner team.

ON THE CINDER PATH

At the top: Julian Jackson clearing the bar at six feet.
Middle: Joe Strawhun, at the beginning of a long heave.
Bottom: George Mitsch and Russell Youngbluth topping
the timbers in the 220-yard low hurdles.

Third place in the annual M. I. A. A. Indoor Track Meet was the fortune of the Miners this year, as Coach Gale Bullman's charges made a good showing in the distance events and the hurdles. Cape Girardeau won the title with Springfield close behind them. Although the Miners were able to garner quite a few seconds and thirds they were able to take only one first, that in the half-mile when Capt. Eddie Ballman galloped home ahead of the pack. Julian Jackson tied Goddard of Cape for first in the high jump.

In the outdoor meets before we go to press, the Miners have won four and lost two dual meets, and figure to finish high in the conference meet to be held at Maryville. The Miners were too strong for the Drury Panthers, the Westminster Bluejays, the Kirksville Bulldogs and the

Warrensburg Mules. On the other hand Springfield Teachers and Cape Girardeau took the Miners into camp rather easily.

The Miners have been particularly strong in the distance runs, with veterans Eddie Ballman, George Fort and Norman Tucker furnishing most of the points. All three men won all their races in their specialties, except against Springfield. Fort climaxed his early-season work by breaking the 32-year old school record in the mile against Drury. This Spring Norman Tucker has been joined by his brother, Armin, and both men are doing very well in the two-mile. Some of the middle distance men who show promise are Barrett, Pohlman, Carver and Lynch.

Julian Jackson in the high jump, George Machens in the javelin, Carl Lintner and Clark Romine in the pole vault, and Otis Taylor and Harley Ladd in the shot and broad jump, provide most of the material for the field events. Besides his tie with Goddard in the conference and in a later dual meet, Jackson has won the high jump in all dual meets and should be a conference winner. He has been getting above six feet all year.

Machens has been a consistent winner in the javelin, and with Joe Strawhun, has been going well in the discus. Taylor and Ladd have been able to earn points in the dashes, while Russell Youngbluth and George Mitsch have taken care of the hurdles. Corneau has also been coming along fast in the hurdles.

Top, left to right: Lintner ready to take off, Taylor and Ladd warming up, Machens preparing for a throw.

Bottom: Capt. Ballman, Fort and N. Tucker getting pre-meet instructions from Coach Bullman.

Left to right: Carroll, Clayton, Walley and Watts.

Top row: Allen, Weber, Leber, Baumstark, and Silhavey. Bottom row: Harsell, McCutcheon, Spalding and Emery.

GOLF and TENNIS

Four men have borne the brunt of competition for the Miners this season in golf, three of whom played on last year's team. Floyd Watts, winner of the Intramural tournament, was No. 1 man, and was undefeated when the ROLLAMO went to press. Omar Walley played No. 2, with Buddy Clayton No. 3 post and Joe Carroll No. 4. In four meets this combination has been undefeated and should make a strong bid for the M. I. A. A. title before the season is over.

With interest apparently approaching a new height, the court game has proven popular this Spring. However the lack of practice time has caused the team to fall down before intercollegiate competition, and the Miners have yet to win a meet. Harsell has been the ace of the meets, with McCutcheon running a close second. Vic Spalding has been playing the third singles, and Leber and Allen the other. However several of the other men may break into the lineup during the remainder of the season.

Rifle Team

In the corps area intercollegiate match of the present year, the Miner team succeeded in finishing eleventh in competition with twenty-two universities and colleges. In comparing scores made this year in the Randolph Hearst Trophy match, the Miner team moved from twenty-second place to a possible third place, judging by the results of other schools. The last meet of the season saw a score of 3412 by the Miner team in the S. A. M. E. match. The club enjoyed the largest regular attendance ever known in their history, and points to an even bigger year next season.

INTRAMURAL SPORTS

CROSS COUNTRY

Cross country running was added to the Intramural program for the first time this year, the race being held between the halves of the Miner-Carbondale football game. Norman Tucker, sophomore, won the race while Pohlman, junior, was second and Hessman, freshman, was third.

BASKETBALL

Intramural basketball was a popular sport with the students this year with thirteen teams playing a round-robin schedule. At the close of the season, the Junior Independent team was victorious in the open class while the Kappa Alpha squad took the cup for the highest fraternity. Underwood was high scorer for the season.

PING PONG

Twenty-six men entered the ping pong tournament which was recently added to the program. Sigma Nu won the team play with the Juniors second. Jimmie Roux, Sigma Nu, won the singles title, while Underwood, Juniors, was second.

HANDBALL

Theta Kappa Phi won the handball tournament this year with the Kappa Sigma's a close second. In doubles competition the Theta Kappa Phi team of Herzog and O'Connell took first, with Ballman and Carroll, K. A.'s second. Alger, Kappa Sigma, won the singles, while Dittenhafer, Theta Kappa Phi, took second.

SWIMMING

Forty men competed in the annual swimming meet with the Sigma Nu's walking off with first place honors. The Freshmen took second place.

The individual winners were:

40-Yard Free Style — Emery
Sigma Nu.

100-Yard Free Style — Katz,
Sigma Nu.

200-Yard Free Style — Ward,
Sigma Nu.

100-Yard Breast Stroke — Miller,
Sigma Nu.

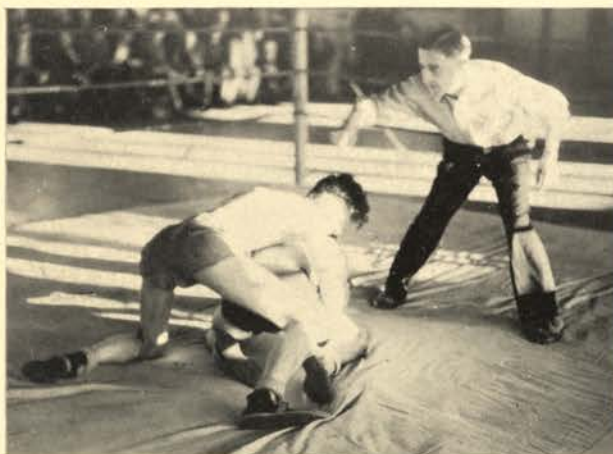

100-Yard Back Stroke — Johnson,
Freshmen.

160-Yard Relay — Sigma Nu.

120-Yard Medley Relay — Sigma
Nu.

Diving — Sparks, Junior.

concrete
courts.

BOXING

Enough interest was shown in boxing this year to add it to the Intramural program, along with the old standby, wrestling. The Sophomore team won first place, and the Sigma Nu's and Freshmen tied for second.

The Winners:

125-Pound Class — Schauble, Freshmen.

135-Pound Class — Kilgore, Lambda Chi.

145-Pound Class — Anderson, Sophomore, and Kiesler, Triangle, tied.

165-Pound Class — Boorky, Junior.

175-Pound Class — Cunningham, Theta Kappa Phi.

Heavyweight — Bradley, Sigma Nu.

WRESTLING

Lambda Chi Alpha won the wrestling title this year, with the Sigma Nu's second. All-together 37 men were entered in the tournament.

The Winners were:

112-Pound Class — Kelly, Sophomore.

118-Pound Class — Shanfeld, A. L. T.

126-Pound Class — Buckner, Freshmen.

135-Pound Class — Torance, Lambda Chi.

142-Pound Class — Emery, Sigma Nu.

148-Pound Class — Taylor, Theta Kappa Phi.

155-Pound Class — Loveridge, Sigma Nu.

165-Pound Class — Johnson, A. L. T.

175-Pound Class — Axthelm, Lambda Chi.

Heavyweight — Strawhun, Sophomore.

GOLF

As the Rollamo goes to press, we find that the Kappa Alpha golf team won the 72 hole team medal play, taking the Triangles into camp by four strokes. Watts carded 304 for medal honors.

At the time of this writing, the intramural tennis, softball, and track results have not been recorded.

CAMPUS PERSONALITIES

"Walt" Goelkel. Czar of the Student Council.

"Joe" Murphy. Student, athlete, all around good fellow.

"Mel" Nickel. Athlete, pride of the Met Department.

Craig Ellis. Blue Key head.

Dick Prough. Student, athlete, and yearbook editor.

"Bert" Lanier. Honor man of the class.

"Snuffy" Smith. Keystone of the Independents.

"Gilmore" Miller. Maestro of the Musicians.

"Burr" Turner. Big chief of the St. Pat's Board.

"Soapy" Casteel. Big man among the hard rocks.

Don Bowman. Papa to the Lambda Chi's.

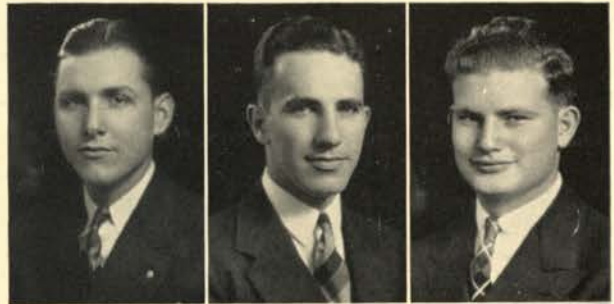

"Butch" Kuhlman. Athletic Association "No" man.

"Compton Sez" Compton. Publicity man for the athletic stars.

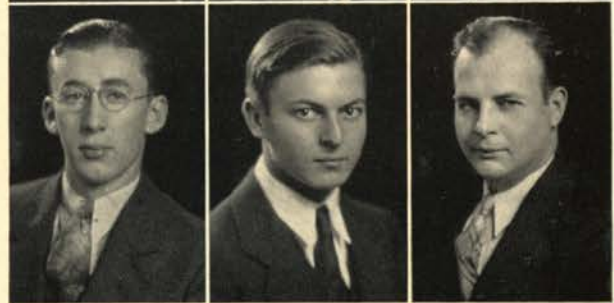

"Mac" McCloskey. Editor of the weekly blurb.

"Runt" Radcliffe. Interfraternity Council big shot.

INTERFRATERNITY COUNCIL

The Interfraternity Council was organized for the purpose of maintaining close friendship and cooperation among the fraternities on the campus of the Missouri School of Mines.

Each social fraternity is represented on the council by a Senior and a Junior member elected by their respective fraternity. These representatives, on all matters coming before the council, present the feeling of his fraternity and each fraternity abides by the ruling of the council. The Council, as a body, works for the best interests of the school.

The officers of the Council for the school year 1937-38 are: President, J. C. Radcliffe; Vice-President, R. C. Tittel; Secretary, W. L. Goelkel; Treasurer, S. E. Johnson.

The Interfraternity Council takes part in creating a better intramural sports program for the school. The Council sponsors a dance each year, at which time all students are invited to attend. This dance is just one of the steps that the Council takes in promoting better feeling among the students of the school.

Pi Kappa Alpha

Pi Kappa Alpha was founded by six students at the University of Virginia in 1868. It began as a distinctly Southern fraternity and remained so until the New Orleans Convention of 1909. At this meeting it was decided to discard all geographical boundaries, and since that date chapters have been established on campuses in all parts of the United States. The fraternity now has 74 active and 82 alumni chapters.

Alpha Kappa chapter was chartered on the M. S. M. campus in November, 1905, and has been active since that time.

Triangle

Triangle is a fraternity of engineers. It was founded at the University of Illinois on April 15, 1907 by a group of Civil Engineers. Triangle has grown since that time till there are 16 chapters located at the following Universities: Illinois, Purdue, Ohio State, Wisconsin, Kentucky, Cincinnati, Iowa, Minnesota, Armour Institute of Technology, Michigan, Kansas, Missouri School of Mines, Pennsylvania State College, South Dakota School of Mines, Northwestern, and Marquette.

The local chapter on this campus was originally the Grubstakers Club, the oldest local club on the campus, founded Sept. 15, 1902. It was installed as the Missouri Mines Chapter of Triangle December 10, 1927. It is the only professional fraternity on the campus that maintains a chapter house, and in addition offers all the advantages of a social fraternity.

Sigma Pi

The Sigma Pi Fraternity was founded on February 26, 1897 at Vincennes University, Vincennes, Indiana. Next to the Miami Triad it is the oldest national fraternity originating west of the Ohio River. This chapter was formerly known as the Prospector's Club. On April 29, 1933 it was installed as the Alpha Iota Chapter of Sigma Pi.

Sixteen upperclassmen at the School of Mines founded and organized the Prospector's Club. These men did not belong to any other social fraternity. Their original constitution was "To foster good fellowship among its members and frankly strive to promote the interest of the members and of the School of Mines." It was recognized by the School of Mines in January, 1914.

Lambda Chi Alpha

Lambda Chi Alpha is a general or social college fraternity which was founded at Boston University on November 2, 1909. In organization and general character it is similar to other college fraternities. It is one of the sixty senior members of the National Interfraternity Conference, the Society made up of general, social college fraternities.

Alpha Delta Zeta of Lambda Chi Alpha was organized in 1917 by members of the Mucker's Club. This was a social organization which was formed in September, 1914 and held a foremost position on the campus for four years before being initiated into the national fraternity of Lambda Chi Alpha.

Kappa Sigma

Kappa Sigma, a national social fraternity, was founded at the University of Virginia in 1860 with five charter members. The founders were not denied opportunity to become associated with any of the dozen fraternities on the Virginia campus at the time, but desired to form their own organization. Kappa Sigma still leases the room, No. 46 East Lawn, University of Virginia, where the fraternity was founded, as a memorial. The fraternity is national in scope, being represented in every state except Nevada, Delaware, and Connecticut.

The Beta Chi Chapter of Kappa Sigma was Founded on the M.S.M. campus on December 19, 1903, with ten charter members. These men were initiated by representatives of four other chapters of Kappa Sigma. This fraternity was the third to be established on this campus.

Kappa Alpha

As a national fraternity, Kappa Alpha is unique in that in the course of its development it has remained distinctly sectional. It has confined itself within its chosen limits, that territory south of the Mason and Dixon line. Despite the fact that it occupies only about half the country it has attained a high position in competition with national fraternities. Founded at Washington College (now Washington and Lee) in 1865 under the tutelage of General Robert E. Lee this fraternity has sought to carry on the customs and ideals so excellently personified in the greatest of Civil War generals.

Beta Alpha chapter of Kappa Alpha was installed at Missouri School of Mines on April 26, 1903 and was the second national fraternity to install a chapter on this campus. Although the chapter was inactive for about five years it is again firmly established among the fraternities at MSM.

Alpha Lambda Tau

The Phi chapter of Alpha Lambda Tau was installed on the M.S.M. campus on March 16, 1935. However, the chapter did not become active until September of that year. Phi chapter was originally the Bonanza Club, a local fraternity founded in 1915.

Alpha Lambda Tau as a national fraternity was founded at Oglethorpe University in Georgia in 1916. It was originally to be only a southern fraternity, but in 1927 the first northern chapter was founded at the University of Illinois. At the present, there are thirty-two active and ten alumni chapters. The national organization publishes a monthly magazine, the "Alt," and a quarterly, the "Rose Leaf."

Theta Kappa Phi

Theta Kappa Phi, a national social fraternity, was established at Lehigh University, October 1, 1919. The Mu Chapter of Theta Kappa Phi was installed at the Missouri School of Mines, November 29, 1936.

The purpose of this fraternity is primarily to bring the students into brotherly relationship; to promote the spirit of good fellowship; to encourage the attainment of a high scholastic standing; and to offer to each and every member the training and environment which characterizes the university or college man.

The local chapter of The Order of Cardinal Mercier was established in September, 1925, when seven men organized. Their first eleven pledges were initiated in January, 1926.

THE CORONATION

After fifty-two weeks of waiting the thirtieth annual St. Pat's Celebration has come and gone. The affair was the largest ever known on the Missouri School of Mines Campus. It exceeded all others in both number and gaiety. Guests from all over the state and surrounding country were here to help the Miners pay tribute to the engineers' Patron Saint, St. Patrick.

The big party started Thursday night at eight by the Independents playing hosts at Jackling Gym. There the gay throng entered into the St. Patrick spirit. From there the happy group trekked to the Pierce Pennant Tavern where another dance was in progress which was given by the Lambda Chi's, Theta Kap's, Sigma Pi's, Kappa Sig's, Triangles, Kappa Alpha's, and the Alpha Lambda Tau's. This dance continued to the early morning and when the music stopped, so stopped the first evening of the celebration.

A big gathering was at the Frisco Station at 1:30 Friday afternoon, to meet J. R. Post in guise of St. Patrick. Upon his arrival on a hand car, pushed by two of his guards, he was ushered to a quaint old wagon in which he made his journey to Parker Hall. A parade of cars followed him through the streets of Rolla and up to the school's auditorium. Here he delivered his address, and making a few timely remarks, had the seniors kiss the Blarney Stone, and then knighted them into the Royal Order.

The high spot of the thirtieth St. Pat's was the Costume Ball Friday night at Jackling Gymnasium, which was lavishly decorated with a blue starry ceiling, red draped walls, revolving reflectors casting soft lights overhead, and a throne on a platform at the far end of the building. The dance floor was jammed with costumed dancers swaying to the melodies of Frankie Masters; the galleries above were filled with spectators. At twelve o'clock the orchestra struck up the familiar air, "The Wearing of the Green," and while the crowd kow-towed and cameras flashed, St. Patrick, his guards, and his pages marched up the center of the floor followed by the retiring St. Pat's queen, Miss Mildred Brown, and the Maids of Honor. Then with her attendants came the Queen, Miss Mary Louise Breuer. This marked the end of the most important and spectacular event of a night of fun.

Other activities during the celebration were the Pi Kappa Alpha Jam-Session Friday afternoon, after the knighting ceremony, and the Sigma Nu Tea Dance, Saturday afternoon.

Last came Saturday night and the Formal Ball, preceded by formal dinners at the various chapter houses. The ball that night was a sharp contrast to that of the previous evening, but was none less brilliant. When the last strains of music, furnished by Frankie Masters, faded from Jackling gym, the joyful, but tired crowd knew that St. Pat's had ended.

When another week-end so filled with jolly fun and happy spirit comes to M. S. M., it will again be St. Pat's. St. Pat's 1938 will live forever.

THE MINERS GO TO A PARTY ST. PATS

The official, office approved Blarney Stone. St. Pat had an idea that he could bring in a 'ringer' but the fear of probation caused him to produce this object. It served the purpose, however, very well.

Swinging it in LIFE's style with Powell Dennie, Bob Ridley, and dates at the costume ball.

The crowd howled when Compton had to kow-tow to His Highness during the knighting ceremony.

At the Pennant during intermission. With dates like these, St. Pat's was a truly glorious affair. If you don't believe this, ask "Runt."

The swing maestro, Frankie Masters, always had a crowd around his bandstand.

Just incidentally, LIFE went to this party too, but when it was all over, he had had too big a time to be able to relate it to his boss. We are now publishing his pictures in this volume.

The St. Pat's Board was founded in 1930 to supervise the arrangements of the biggest social event held on our campus, the annual celebration known as St. Pat's. Twenty men make the board, two from each social fraternity and two from the independents, making everyone represented. The object of this board is to handle and take charge of all matters pertaining to the annual party. During the eight years the St. Pat's Board has had the reins they have shown and proven to be one of the most efficient and well managed organizations we have on our campus.

Dear Mom and Dad,

It sure seems swell to go a long way from home and meet fellows who know you. Imagine coming down here and being met by fellows that knew my name, but whom I have never met. Some fellows met me at the train and brought me to their home, I think they said it was a fraternity or something. All that first week I was so popular. I don't know what I did but all the fellows want me to go out with them. They even took me to the movies.

During the first week we had to take all kinds of tests, and listen to speeches on: 'How to Study', 'What is an Engineer'. One of the speakers name was Dr. Mann and he gave us a test to find out what we should follow. He asked ridiculous questions. One of them was: Would you rather be a street car conductor or a policeman. I didn't know what to answer because I thought they knew I came here to be an engineer. The final check of the test showed that I ought to be a scientific farmer.

I was just getting ready to come back home when they had class day. It was terribly embarrassing walking around town without any pants while the girls looked. These girls down here are funny, they laugh at us. Our class won the fight but still we didn't gain anything. An upperclassman asked me for a match and because I never use them he took my pants. Later on I found out we should always carry matches.

I have a professor in Chemistry who likes to play tricks. I never thought teachers were like that. He reminds me of Uncle Billy who used to scare the kids away by dressing up like a ghost. The people

around here talk peculiar, I hope I don't pick up their accent. Having an easier time now but have to wear a green cap and suspenders. As soon as I put mine on some senior asked me to button. I thought he was crazy and asked him what he said. He got mad and yelled "Button, freshman!" and some boys across the street stopped and stooped with their finger touching the button. I started to laugh and the senior got mad and told me to button ten times.

As I said I was ready to come home but I was ashamed to come after being seen without pants. Tell Dad and the girls that I miss them and for him to send a hundred dollars.

Dear Mom and Pappy:

Shucks mom I sure is begining t'talk lake these folks down here an' ah reckon that hain't no use t'stop now. Maybe when ah comes home you all can help me lose it.

Last week dem frat-tern-ity folks got me lock up in dose houses an dey told me dat I should belong to dere house an before ah could say no dey pined me. Know, they didn't nock me down but they put a prety medal on me and den said I should be proud I was a fraternities pledge. Ah stills don't know what 'tis but I have bin making beds an fixin da fire since then. I gues its a honour to be able to work. Mommy tell pappy dat he better send dat hundred dollars because I bin going out with dese Rolla gals and they sure no how t' spend money. Ah got a pirty one an I spent fifty cents an took her to t'danse. They called it home coming. They had a parade an the danse dat night but ah cain't see why they calls it homecoming because we alls here anyway.

We played our first football game an us freshmin had a lot fum our class playing. We lost t'game though an didn't get our free show. Ah had planed to take my gal to it but we had to set home and hold hands insted. My algiber teacher still walks around lake he got rymathism. Ah sure hope he gets well so he ken straighten up. Ah will write a nother letter next month because I got t'be ecomicle. Wright soon and tell pappy t'send dat money.

Your son,

Moe

Dear Mammy and Pappy:

Ah begining t'find dat ah don't knows anything cause ah got a big O on my chem-stry quiz. Magine my teacher lakes to draugh so he uses my quiz paper for scrap paper. Ah don't want t'be mean but dats gotta stop. Ah bin saving dem to show yo'all but ah ashamed with all dat on dem. We lost a nother football game dat makes five in two months. Ah still te favrite maid for th'fratern-
itie house but de fellows say dat they are going t'take de priv-leges fum me whens dey in-itates me. Ah have t'get a lotta good marks first so ah think ah will still hold my job. Ah take my gal Maybell out agin t'one of dose dances. Ah heard some thin bout a big apple an as we was hungry we went. Ah never did see dat big apple though. One of dose city gals came here and showed us pictures of ary-
planes an wild animals she catched in Africa. I kin draugh pirth good now I finished my first plate yes-ter day an ah ought t'get at least fifty. Th'other day Mr. Huberd our big man sent me a letter asking me t'see him. Ah so excited cause th'fellows says his going to congradlate me for my good work. We had one of dose mitins and Charles Kock was elected our pres-dent. Ah haint bin getting pants latly. Th'fellows in my class say they is sissies.

If ah don't get some more money Ah'll have t'start studyin to pass the time a'way. Tell pappy ah sends my love but it won't last long if he don't send dat money.

Dear Mammy and Pappy:

Dat money yo' sent me surn' came in handy. It seems dat dis bein th' last week afore christmas all th' frat-tern-ities are havin dances. All th' fellas ax fo dates so ah ax mah May'bel, yo'see I'se still goin with her. Day made me put on a tuxedo. Ah never will go to another one of dose dances cause ah felt funny in dat contraption. Everybody is all excited to go home but ah don't want to leave mah li'l gal. Anyway mammy ah don't believe in Santa Clause any more since ah been gettin editiated down hyar. Ah forgot t'tell yo'all about stunt night. All the fratitern-iteies an enpendents put on a show. It sur'n was pirty good. After th' show prizes were givin to th'one who put on th' best act. Th' Sigma Nues got it.

Only yesterday th'major bawled me out cause he saw me walkin around with may army pants on. We haint afraid of dose soph-mores now an we never follow th'regulations. Th'sophmores are a bunch of sissies jest like Pricy Jones who use t'play with dolls. Dey are afraid of us. Next year when we become sophs we are really goin to make th' freshmin suffer.

Ah is kind of afraid to come home cause yo'folks won't reckonize me since I come hyar. We never dress up but wear corderoys and sweat shirts all th'time. Give mah love to sis and pappy.

Your lovin son,

Moe

Dear Mammy and Poppy:

We started our next semester and now ah is beginning to take real engineers subjects. Every Saturday ah takes surveying and we suppose t'measure angles but we bin foolin th'prof cause all we look at is th' pirty girls walkin in th'sun. The other day th' prof told me ah measured th'wrong angle but ah don't think ah did cause she was sure pirty. Ah hain't goin with li'l Maybel cause she says I shouldn't use the transit th' way I dose. Ah forgot t' tell ya'all that I only flunked three subjects last sesmester. Ah passes English though cause the prof ah got caint see me cheatin when he wears his glasses.

Ah think ah will be a gun dis term cause ah had th'same courses last term an beside ah have some of th' upper classmin help me. Ah passes mah first chemistry quiz an ah got a fifty eight. Th' reason ah passed was cause dose fellas helped me. Our basket ball team lost th' first game. One of th' fellas on the team wants t' bet me dat dey lose all th' games this year. Our class gave a sweater dance to the upper-classmin. It was a big sucess. Ah think dat the other dances would be a big sucess if dey was free. Ah haint bin out much dis week cause I haint got any money. Tell pappy t' send more.

Dear Mammy and Pappy:

Ah hain't received that money yet an th' fellas tell me ah better get some cause St. Pats is coming. Ah didn't know whut dey was saying until ah attended a mass meeting and th' fellas told us freshmin dat St. Pats was a holyday and dat was th' time day could git drunk without bein put out of school. One of th' fellas gave out cards t' the freshmin and when ah got mine ah thought it was a diploma. Ah guess ah jist haint quite edictated enough yet. Ah bin making a lot of things over in Chem lab. Yoh see th' professor gives us some stuff an tells us t' find out whut it is.

Every time ah hands in whut ah gest ah gits a slip marked repeat. One of th' lab instructors told me dat th' one who gits the most slips wins a prize. Ah have thirty slips so far and ah don't know any-one who has more. Ah sure hope th' prize is good. Mamy tell pappy dat ah knows test the place fo him t' sleep. Every Wednesday and Thursday ah have special lecture and dat is when we all ken sleep. Once in awhile some one who is takin makes a remark and then someone laughs and wakes me up. Dere hain't much more news excipt St. Pats is comin and ah hain't found a date yet. Give mah love t' all.

Dear Mammy:

Ah is afraid t'write t' pappy cause ah spent all mah money St. Pats. Ah had a swell time fum whut ah kin remember. Dey had a orchestra fum Chicago an his name was Frank Masters. Th' queen was crowned and the St. Pat who had come t' town by railroad read nasty things about the seniors. Ah got drunk Saturday nite an the next day ah got a letter to see the director. He told me dat ah was on prohibition an wouldn't get off until I acted better. Ah kind of feel important takin t' the director. He surn is a swell guy.

If things turn out all wright and yo' kin git pappy to forgive me and send me more money ah will come home soon. Dey are goin t' hold graduation next week but ah haint staying cause ah seened enough of dose seniors dis year. Next year ah is going to be a sophmore an then ah kin pants th' new freshmin. Ah cain't wait. Give mah love to all and tell mah gal back hame dat she will lake my accent.
